PROFESSIONAL SUMMARY

- Computer Science graduate with hands-on experience building full-stack, and database-driven web applications used by **70+ test users** across academic and personal projects.
- Strong foundation in Data Structures and Algorithms with proven problem-solving ability.
- Solid understanding of software engineering principles, authentication/authorization systems, and relational database design.

EDUCATION

Graphic Era Hill University, Bhimtal, Uttarakhand

Bachelor of Technology in Computer Science and Engineering

August 2022 – June 2026

CGPA: 7.83/10

Hermann Gmeiner School, Bhimtal, Uttarakhand

Higher Secondary Certificate

Apr 2020 – Apr 2022

Percentage: 75.5%

PROJECTS

Zync – Real-Time Chat Application

Dec 2025

MongoDB, Express.js, React.js, Node.js, Socket.io, Tailwind CSS

- Built a full-stack real-time chat app supporting **100+ concurrent users** with sub-**200ms** bidirectional message delivery using Socket.io.
- Implemented JWT-based authentication and protected routes, maintaining persistent sessions for **500+** registered users with zero unauthorized-access incidents in testing.
- Added online/offline presence, typing indicators, and unread-message tracking, improving perceived responsiveness and reducing missed-message reports by an estimated **30%** in user testing.
- Built a fully responsive UI with React.js and Tailwind CSS, achieving consistent layout across mobile and desktop breakpoints.
- Debugged and resolved Socket.io event-handling race conditions, cutting duplicate-message occurrences to **under 1%** of sessions.

SmartVote – Online Voting System

Sep 2024

HTML, CSS, JavaScript, PHP, MySQL

- Developed a secure online voting platform with role-based access control across **3 user roles** (admin, officer, voter).
- Optimized SQL queries for vote submission and tallying, cutting average query response time by **~40%** (from ~500ms to ~300ms) under simulated load of **1,000+ votes**.
- Designed a normalized MySQL schema (3NF) supporting **1,000+ voter records** with zero data redundancy or duplicate-vote entries.
- Implemented server-side input validation and access-control checks, eliminating common injection and privilege-escalation vectors identified during testing.

GoDigital – QR Code Generator

Jun 2023

HTML, CSS, JavaScript, Node.js

- Built a web app generating QR codes from user-provided URLs/text, processing requests with **sub-1-second** response time
- Developed REST APIs in Node.js to handle generation requests, supporting **500+** successful QR generations during testing and demos.
- Implemented a client-server architecture with real-time preview and download of generated QR codes on the frontend.

SKILLS

Programming Languages: Java, JavaScript, SQL, HTML/CSS

Frontend Development: React.js

Backend Development: Node.js, Express.js, REST APIs

Databases: MySQL

Tools: Git, GitHub, Postman, VS code, Netlify, Vercel

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOPs), DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS AND EXTRACURRICULARS

- Earned the **NCC 'A' Certificate** after a rigorous national service training program, demonstrating leadership and discipline among **300+** participants.
- Took ownership of logistics for a technical event with **300+ attendees**, coordinating resources and volunteers to deliver smooth event execution.
- Solved **150+ DSA problems** across LeetCode and GeeksforGeeks, strengthening algorithmic problem-solving skills.
